

CAPABILITY STATEMENT

OCCUPATIONAL HYGIENE

Our Occupational Hygienist can assist you in providing a safe workplace environment and enable you to comply with WHS legislative requirements and regulations.

OUR APPROACH

Verico predominantly operate within the biological and chemical hazard categories covering noise, inhalable and respirable air pollution (asbestos, gaseous and particulate), electromagnetic radiation, heat stress and hazardous chemical exposure. We implement programs to monitor, quantify and report in terms of compliance with accepted exposure limits.

TYPICAL OCCUPATIONAL HYGIENE PROGRAM

OUR SERVICES INCLUDE:

- Occupational risk assessments
- Site and building hazardous substances audits
- Asbestos site audits and clearances
- Asbestos fibre monitoring (NATA accredited)
- Occupational hygiene monitoring
- Airborne respirable and inspirable dust
- Occupational noise
- Hazardous chemicals assessment
- Gas and vapour exposure
- Indoor air quality investigations
- Occupational vibration assessment
- Occupational lighting assessment
- Building audits
- Synthetic mineral fibre monitoring
- Heat stress assessments
- Ventilation and fume collection audits
- Hygiene audit

OCCUPATIONAL HYGIENE

SPECIALIST OCCUPATIONAL HYGIENE

Verico has extensive experience in providing services in a wide range of workplace occupational hygiene areas.

Our Occupational Hygiene Specialist can audit your current situation, carry out risk assessments and recommend a course of action for the recognition, evaluation and control of workplace environment hazards. This also includes hazardous substance site and building audits, hazardous substances registers and recommendations for risk mitigation controls.

Our Senior Occupational Hygienist has tertiary qualifications in Occupational and Environmental Hygiene, is a member of the Australian Institute of Occupational Hygienists (AIOH), has NATA accreditation for Asbestos Fiber Monitoring and is a Licensed Asbestos Assessor.

We provide Asbestos Management services for industrial or public sectors including site asbestos audits, site asbestos registers, production and review of site asbestos management plans, third party audit of asbestos removal contractors, and remediated asbestos site clearance certificates.

AUSTRALIAN INSTITUTE OF OCCUPATIONAL HYGIENISTS

As a full member of AIOH, our Senior Occupational Hygienist undertakes regular professional development, has the recognition of industry peers, holds an AIOH Membership Certificate and has:

- Completed relevant tertiary studies
- Been working in the field of occupational hygiene or one of its specialist branches for more than five years in a professional capacity
- Demonstrated to the AIOH Council that they have achieved a satisfactory level of professional knowledge and competence through successful completion of an oral examination
- Continued to demonstrate an ongoing commitment to excellence and maintaining their professional currency through ongoing professional development.

NATA ACCREDITATION

Verico has NATA accreditation for Asbestos Fiber Monitoring and is a Licensed Asbestos Assessor.
